EDUCATION

University of Georgia | Athens, GA Expected May 2029

Bachelor of Science, Intended Computer Science | Overall GPA: 3.90/4.00

Coursework: Software Development; Systems Programming and Data Structures (in progress, Fall 2026)

Augusta University | Transferred to University of Georgia Aug 2025 - May 2026

President's List (Spring 2026)

TECHNICAL SKILLS

Offensive Security: Vulnerability analysis, penetration testing, reverse engineering, exploit analysis, CTF attack-defense

Languages & Development: Python, Java, C#, SQL, HTML, Flask, PostgreSQL; software development

Security Tools: Ghidra, pwntools, Hashcat, Sliver C2, TraceBit

Systems & Infrastructure: Linux/Unix (Fedora), Windows, Nginx, SSH, Samba; configuration and hardening

OFFENSIVE CYBER ENGINEERING & TECHNICAL PROJECTS

Router Vulnerability Analysis & Firmware Replacement | Personal Project Jul 2026

- Identified and exploited vulnerabilities in an Asus router to obtain root access and bypass its stock bootloader.
- Replaced legacy firmware with an open-source alternative, improving administrative control and security.

FAUST CTF | Attack-Defense Competitor Sep 2026

- Placed among the top 30 of 500 teams (top 6%); balanced live exploitation, service protection, and team coordination.

NCAE Cyber Games | Website & Database Administrator Feb 2026

- Deployed and administered a Flask/Nginx application backed by PostgreSQL, managing its configuration and availability.
- Triaged attacks from approximately 30 red-team participants; earned Blue Team MVP and team placed 5th in the Southeast.

Viceroy Gilded Guardian Competition | Team Captain Apr 2026

- Led team to 3rd place in a simulated missile-defense scenario; used Sliver C2 to access a modeled launcher, analyze services, and neutralize the simulated threat.

Raymond James CTF | Invite-Only Competitor Oct 2026

- Earned top-10 finish across Jeopardy challenges, attack-defense and incident response; analyzed evidence, wrote a formal report and presented recommendations.

Linux Server Build & Hardening | Personal Project Jan 2026

- Repurposed legacy hardware into a multiuser Linux server with SSH and Samba; added TraceBit honey credentials to alert on unauthorized access.

VandyHacks | AI Engineer Mar 2026

- Built a locally hosted AI chatbot for disaster-recovery guidance without external API dependencies; won Best Financial Project Overall.

CERTIFICATIONS & ENGAGEMENT

Certifications: CompTIA Security+; GIAC GFACT; Cisco CCST Cybersecurity; AWS Certified Cloud Practitioner; AWS Certified AI Practitioner

UGA Hack Pack: Hands-on cybersecurity labs, peer collaboration and CTF preparation (Aug 2026 - Present).
